

WHAT IS THE NUMBER ONE CAUSE OF INJURY IN THE TRUCKING INDUSTRY? “SLIP AND FALL”

Having been a driver in the transportation industry the LPL was the results of my desire to reduce the number of times I had to climb in and out of the tractor to check for alignment of the tandem locking pin with the locking hole located in the trailer slide rail.

Why it is so unique:

The uniqueness of this device is that it allows the driver to locate the tandem-locking pin. One might say it is the drivers extra set of eyes. This alone saves the driver time.

What it can do for drivers:

The driver will experience a tremendous reduction in climbing in and out of the tractor, injury due to slip and fall, time that it takes to adjust trailer, anger and frustration caused by having to climb up and down in and out of their tractor so many times. Reduces idle time, reduced greenhouse gases, more fuel savings, and reduces wear and tear on clutches, transmissions and engines.

When it used:

The LPL is used anytime the trailer is in need of adjustment, in the case of weight distribution or just plane balancing of the load for a better ride.

For only \$49.95 you can own the most useful tool a driver could ever have. Call Don and ask for the Locking Pin Locator.

What are the Benefits?

For the Drivers:

- Reduce climbing up and down from tractor.
- Reduce possibility of injury.
- Reduce time it takes to adjust load weight.
- On the road sooner added mileage/pay.
- Great for sliding trailer at night.

For the Company:

- Reduce injuries due to slip and fall.
- Reduce lost time due to injury.
- Reduce worker compensation claims.
- Reduce worker comp insurance premiums.
- Eliminate spotters to help the driver.
