GPS online vehicle and fleet asset equipment tracking - \$29.95 per month per vehicle!

NO Equipment Costs **NO Minimum order** **CANCEL any time**
"Finally! Fleet vehicle and equipment asset management **WITHOUT** the up-front big capital expenditure."

WOW! - Now with a 30-day free trial for one truck to try it out!!!!

Trucks | Vans | Cars

Real-time online GPS inventory - know where your vehicles or equipment are right now. **Better dispatch management** thru knowing where all of your fleet is at all times! (Includes engine idling reports)

Excessive speed, DRIVING BEHAVIOR and driver DOT compliance - manage the safe driving behavior of your fleet and help avoid costly FMCSA compliance issues. **CONTROL YOUR fuel costs** by reducing out-of route miles and better dispatching.

Real-time online asset tracking - Current route status and historical vehicle data shown on the map. Know where they have been with time and date information.

STATE-BY-STATE MILEAGE REPORTS MAKE IFTA FUEL TAX EASY!

Web-based interface allows you to log in from any computer or web-enabled smart-phone and see your assets. Set up warnings, alerts or maintenance reminders to your email or text message your phone.

Construction

Delivery arrival and departure times - Always know when your truck loads or fleet service vehicles arrived and left locations.

Power management / low battery - monitor for low vehicle or equipment battery status. Can be wired to inform you of **Reefer Trailer Faults**.

Automated odometer - know the accumulated **state mileage** of your trucks for IFTA AND set up **automatic maintenance reminders**.

Simple installation and small footprint hardware - Installed WITH or WITHOUT the driver's knowledge. OBD2 vehicle port OR simple 3-wire 12 volt methods. (single "black box" mini unit measures only 1" x 2" x 3.2")

Fleet Trucks

Boundary crossing - place a geometrical fence or boundary around your rigs and know when they cross it by enabling boundary warnings in your online account management screens.

Stationary information - know when your vehicles are stopped and for how long.

BETTER TIME MANAGEMENT AND FLEET EFFICIENCY SAVES FUEL AND IMPROVES YOUR BUSINESS BOTTOM LINE!

Standard version AND ruggedized versions. Miles and/or hours of operation counters and reports and schedules.

QUAD-BAND 3G DEVICE with INTERNAL BACKUP BATTERY!

(single "black box" mini unit measures only 1" x 2" x 3.2")
