## Vehicle base for the Toyota Highlander (2008-Newer)

### INSTALLATION INSTRUCTIONS

1. Attaching the fixed riser to the No Drill base should be done prior to attaching the base to the vehicle. For a finished look, assemble so the rounded heads of the carriage bolts are on top.
2. Move the passenger seat back to its rearmost position and remove the front seat rail bolts using a 14mm socket wrench. Save and store these bolts should the mount be later removed.
3. Using the provided hardware, place the washers over the longer bolts, pass the bolts through the No Drill base, next through the round stand-offs, and align over the threaded holes in the floor board.
4. Start bolts by hand to insure that the bolts do not cross thread
5. Using a 17mm socket wrench, fully tighten the bolts to secure the base.
6. After a day of use, re-tighten the seat bolts holding the mount.
