

# THE LOCKING PIN LOCATOR LPL-600

## A better way through technology!

WEBSITE: [www.dieselboss.com](http://www.dieselboss.com) (866-851-2346 toll-free) - patented - Made in the U.S.A.

Step 1	Step 2	Step 3	Step 4
Release pins	Place magnetic locking pin probe over hole desired	Once placed this is how it will look.	Slide trailer until light flashes for perfect line-up.
			

The indicator box is magnetic or can also be set on the ground beside the truck and seen in the mirror.

### 1. How the Locking Pin Locator (LPL) came to be:

Having been a driver in the transportation industry the LPL was the result of my desire to reduce the number of times I had to climb in and out of the tractor to check for alignment of the tandem locking pin with the locking hole located in the trailer slide rail.

### 2. Why it is so unique:

The uniqueness of this device is that it allows the driver to locate the tandem-locking pin. One might say it is the drivers extra set of eyes. This alone will save the driver time.

### 3. What it can do for drivers:

Your drivers will experience a tremendous reduction in climbing in and out of the tractor, injury due to slips and falls, time that it takes to adjust trailer, anger and frustration caused by having to climb up and down in and out of their tractor so many times.

### 4. When it used:

The LPL is used anytime the trailer is in need of adjustment, in the case of weight distribution or just plane balancing of the load for a better ride.

### Here are just some of the benefits:

#### For the Drivers:

- ▶ Reduces climbing up and down in and out of the tractor.
- ▶ Reduces possibility of injury.
- ▶ Reduces time it takes to adjust load weight.
- ▶ On the road sooner thus added mileage/pay.
- ▶ Great for sliding trailer at night or day.

#### For Companies and Trucking Schools:

- ▶ Reduces injuries due to slips and falls.
- ▶ Reduction in lost time due to injury.
- ▶ Reduction in worker compensation claims.
- ▶ Could reduce worker compensation insurance premiums.
- ▶ Some companies pay up to **\$50.00** so their driver can acquire help. This cost would be eliminated.
- ▶ Saves wear and tare on clutches, transmissions, and equipment.
- ▶ Saves idle time and fuel.
- ▶ Units weighs less than a pound.
