Vehicle base for the Chevy Impala (2000-2005)

INSTALLATION INSTRUCTIONS

Please note: The Chevy Impala base mounts to the front of the passenger seat not to the floor.

1. Loosen the front bolts that hold the seat cushion to the slides. The bolts only need to be loosened enough to so the mount can be slid between the cushion and the slides.
2. Slide the mount between the cushion and the slides and re-tighten the bolts.
3. Move the seat back to the rear most position.
4. Turn the threaded stabilizers so the mount comes in contact with the floor. This will stabilize the mount and keep the seat from moving forward.

Please Note: If the seat is moved forward, the mounted equipment could possibly hit the dash.
