RAM Drill Seat Bases
National Products, Inc.

**Vehicle base for the
UNIVERSAL (ALL VEHICLES)**

INSTALLATION INSTRUCTIONS

1. Place base on vertical flat surface so that the pedestal is in the optimum location.
2. Mark the mounting hole locations. Please note that it might be necessary to shim a corner of the mounting base if the mounting surface is uneven.
3. Drill 17/32" holes in surface at all of the marked locations. Be extremely careful not to damage any equipment behind mounting surface when drilling.
4. Tighten base in place using bolts, washers, and nuts. If floor is less than 1/4" thick, please use fender washers on the back of mounting surface to help distribute the weight.
